

NEP Azure Landing Zone

Maintaining governance and compliance regulations to successfully adopt cloud native solutions

The Azure Landing Zone is a component of the overall National Enabling Programmes (NEP) that aims to provide Police forces with a foundation upon which they can securely and efficiently adopt cloud services on the Azure platform.

Initially the Azure Landing Zone will support the adoption of Microsoft's next generation cloud native Security Incident and Event Management (SIEM) solution, Azure Sentinel.

The Azure Landing Zone ensures that the appropriate governance and compliance aspects are in place prior to the adoption of the NEP blueprint solutions.

The challenge?

To ensure that you can adopt future NEP blueprint solutions successfully, it is critical that the foundational elements are in place and operating correctly.

This requires a deep level of understanding of the Azure cloud platform and its constituent parts in order to achieve this.

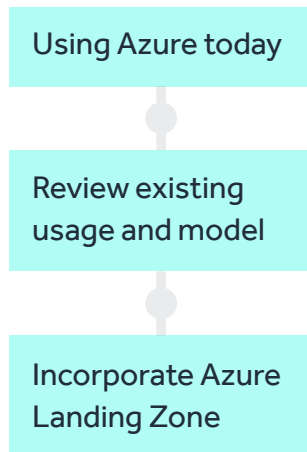

It can involve challenges from a knowledge perspective together with understanding the impact to your existing approach if you currently use Azure cloud services.

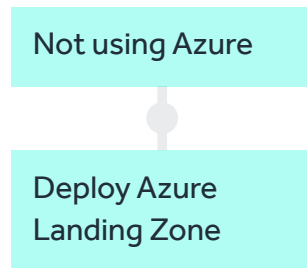

The workshop

ThirdSpace will work collaboratively with you to ensure all the necessary components are in place and that you understand how they work in order to move forward. It's not just about configuration, our approach will help you understand the wider potential of the platform and enable you to identify other opportunities.

Path 1

Path 2

Adoption of the Azure Landing Zone will depend on whether you are using the Azure cloud platform already.

For forces that do not use Azure currently (path 2), it will be a case of developing the foundation in line with the required standards. For forces that are currently using Azure (path 1), we will need to consider your existing approach.

Either way, to adopt the Azure Landing Zone will require certain standards and governance aspects to be in place. This is vital to ensure compliance and security. Our engagement always starts with a workshop where we will agree and define the deployment approach and timelines.

Key deliverables

- Readiness assessment workshop (path 1 only)
- Remediation plan for adoption (path 1 only)
- Adoption Workshop
- Deployment of the Azure Landing Zone in line with the NEP standard blueprint
- Platform documentation
- Knowledge and understanding of the Azure Landing Zone components

Required stakeholders

The workshop is intended for security decision-makers such as:

- Solution Architect
- Key decision makers
- Operational and governance representatives

Next steps

Contact us to find out more about the NEP Azure Landing Zone workshop. Our friendly team of experts will be happy to help.
